

Installing ACU Virtual Private Network (VPN) – Windows 7 and 10

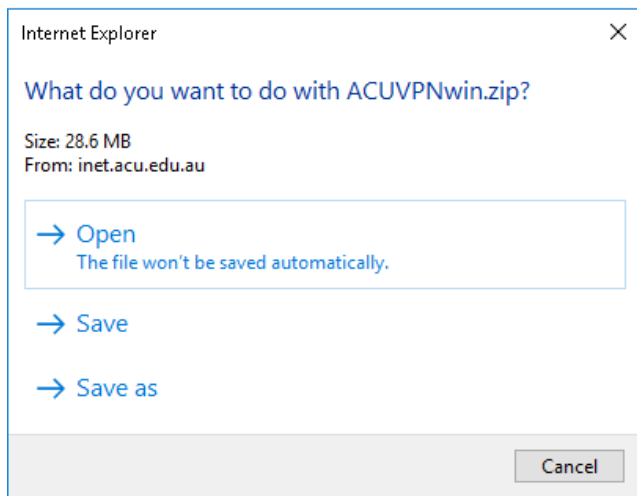

Step 1.

Click on this url

<https://inet.acu.edu.au/acuantiv/vpn/acuglobalvpn/ACUVPNwin.zip>

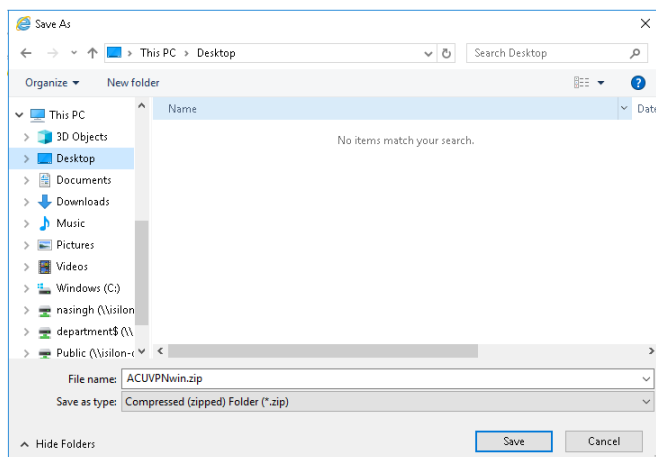

Step 2.

Choose **Save as**

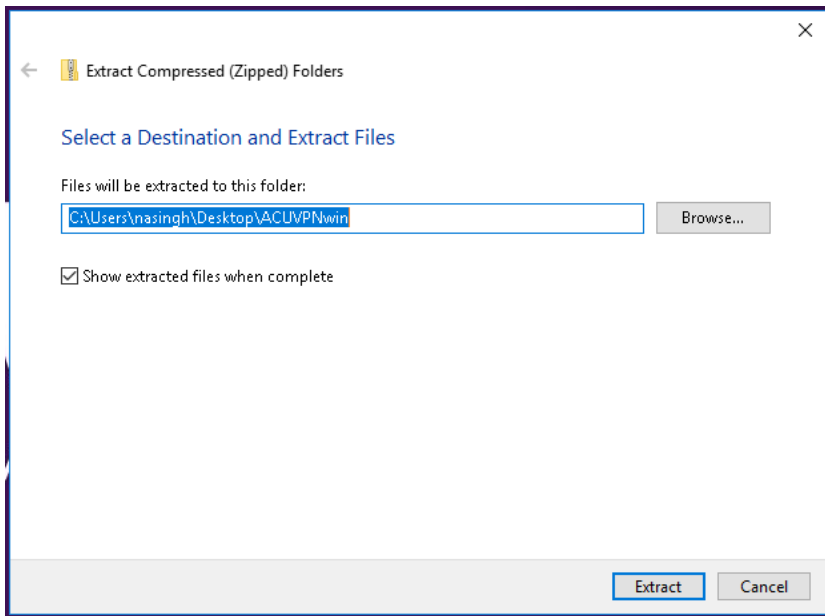

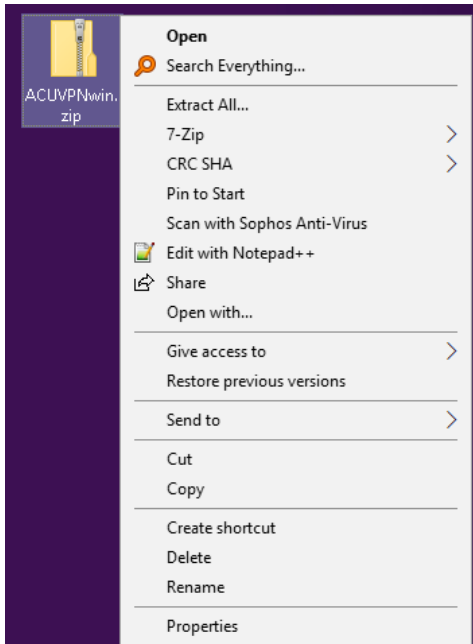

Step 3.

Save the file to a folder of your choice (Desktop in this example)

Step 4.

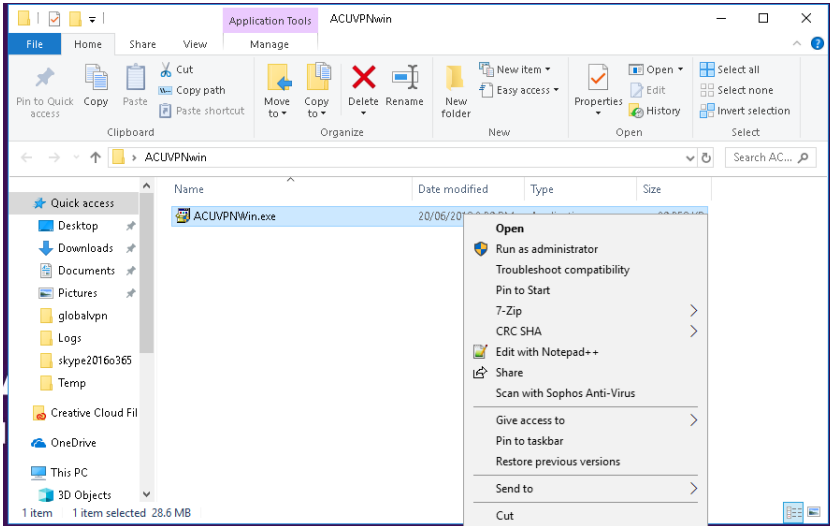

Right click the downloaded file and then click on **Extract All...** Choose the folder (default is desktop)

A file called ACUVPNWin.exe should appear in the folder.

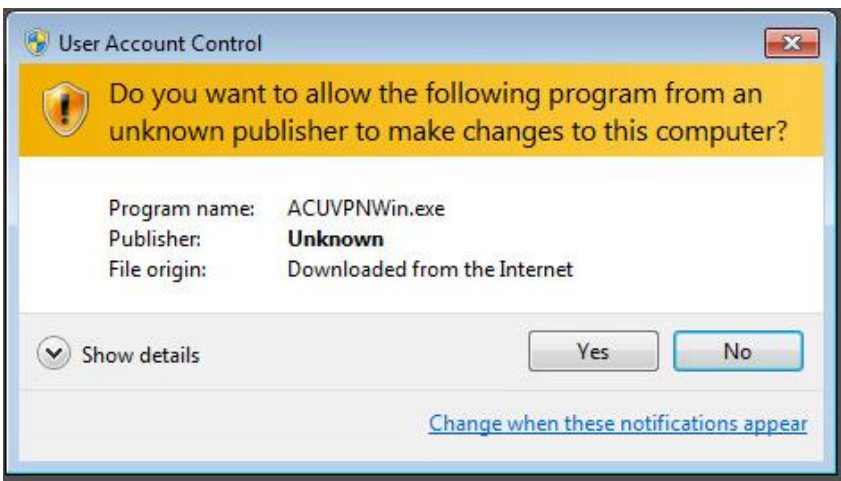

Step 5.

Right click the file and click on **Run as administrator**

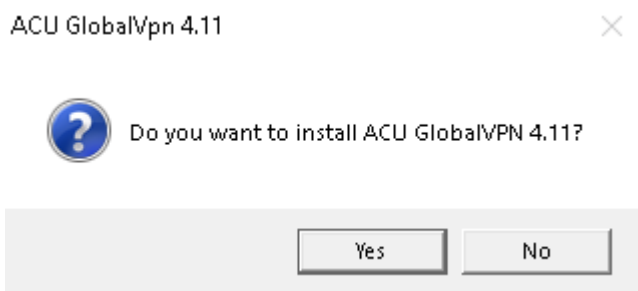

Step 6.

Select **Yes** on the UAC prompt

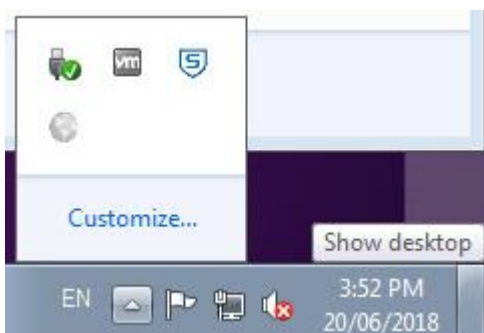

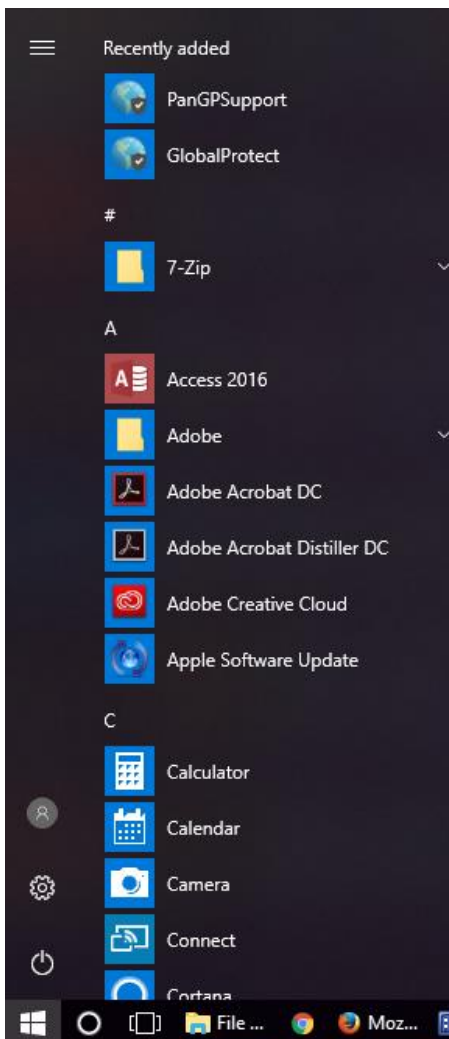

Step 7.

Click **Yes** on the dialog box

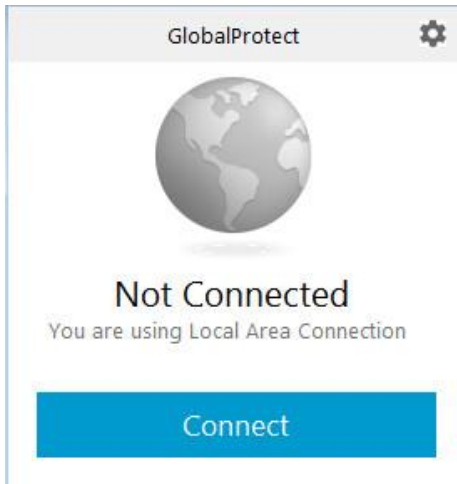

Software should get installed under 30 seconds. It will show up in Start Menu and also the System tray

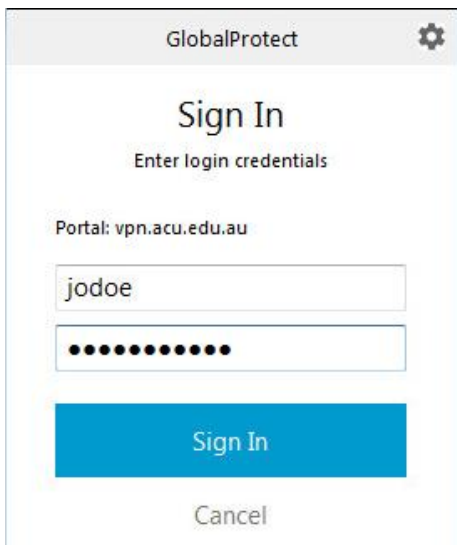

Step 8.

Click on any of the icons above and then click on **Connect**

Step 9.

Sign-in with your ACU ID – username and password

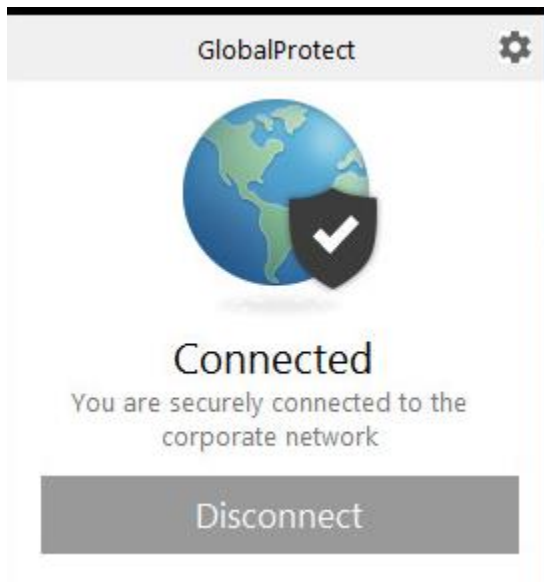

After 30 seconds or so, the dialog box should display **Connected**. The system tray icon will change from grey to Blue.

Step 10.

When done, Click on the system tray icon and click **Disconnect**

SPECIAL NOTE:

GlobalProtect regularly releases an update to the client. When you connect to VPN, you will see a notification about an update as below.

Simply click **Yes** to the following prompts and the update will be downloaded and installed in the background.
